BioPoly® RS Patella System

Patella partial resurfacing device made from a microcomposite of Hyaluronic Acid and UHMWPE

Bio
Hyaluronic Acid

Poly
UHMWPE

BioPoly®

Hydrophilic polymer provides a smooth and lubricious surface to interact favorably with native joint tissues and carry anatomical loads

Advancing Materials. Advancing Outcomes.™
Patient presents with a painful cartilage lesion of the media and/or lateral facet of the patella.

- Arthroscopic assisted implantation is quick and straightforward.
- Joint disruption is minimized.
- Anatomy is preserved.
- Unique implant design and construction restores articulating surface.
- Patient rapidly recovers and returns to activity.
